

KOBRA SSD Shredder

Throat width:
9.5 x 1 in

Shred size:
1/3"x1/3" to 2/3" particles

Security level ISO/IEC 21964 (DIN 66399):
Similar to O-3 T-4 E-3

Shreddable materials:
**Solid State Drives,
 Smartphones, Tablets, USB
 Pen Drives, Circuit Boards,
 Credit Cards, DVDs/CDs**

Waste bin capacity:
26 gal

Voltage:
115 Volt / 60 Hz

Power:
3 HP

Dimensions (WxDxH):
41 x 32 x 48 in

Weight:
550 lbs

TRADE AGREEMENT ACT (TAA) COMPLIANT

MAIN FEATURES

Kobra SSD is a solid state drives/devices shredder capable of destroying solid state drives, smartphones, memory sticks, iPads, USB memory devices, pen drives, tablets, circuit boards, credit cards and ID cards with embedded electronic chip and/or magnetic media, CDs/DVDs, flash memory IC chips, CPU chips with internal ROM and/or flash memory.
Shredded material is reduced in particles of variable sizes.

Kobra SSD is equipped with an integrated internal state-of-the-art HEPA **air filtration system** to insure a clean, safe and comfortable operating environment. The air filtration system continuously transports air from different areas inside the machine including the feed port and filters the air through a HEPA filter to capture and contain any harmful materials used in the manufacturing of ICs.

Kobra SSD is supported by heavy duty lockable, double wheel casters for maximum mobility in the work area.

Easy access 9.5"x1" feed port is designed with a safety brush covering the complete opening for safety and ease of feed operation. **Lockable feed hopper cover** prevents unauthorized access to the contents of the hopper once material is fed into the machine.

Features on the Kobra SSD include **electronic safety lock out and shut down monitoring systems** for bin access door, air filtration system access door and feed hopper, automatic reverse in case of accidental jam, lighted indicator displays to keep the operator informed of machine's operating status, front mounted large lockable emergency stop switch for safety.

Electronic monitoring system continuously adjusts the operation of both stages for reliable synchronous operation. Standard Hour Meter helps the operator keep accurate maintenance records.

Please note that the Kobra SSD is **designed specifically for solid state devices (SSD)**. Shredding of other materials will damage the unit. Output may vary depending on size and density of devices and supply voltage. The Kobra SSD is the perfect device for solid state devices destruction applications backed by Kobra's over 30 years of experience in manufacturing of multi-media destruction equipment.

EXCLUSIVE SHREDDING TECHNOLOGY
 with two stages of destruction to pulverize solid sstate drives

CONTROL PANEL

with LED indicators: keep the operator informed of machine's operating status.
 Emergency Stop Switch: stops immediately all machine functions
